

DICKSON GIS

201 W Chestnut Street, Dickson, TN 37055 615-441-9502

Instructions:

- 1) The driveway must be marked or roughed in with the applicant's name posted.
- 2) The corners of the structure must be marked out with flags or stakes.
- 3) If you have site plans or drawings, e-mail them to: **DICKSON_GIS@CITYOFDICKSONTN.GOV**
- 4) The GIS office will have (7) working business days to assign the address if all the above information has been completed. The reason for marking the driveway/structure is that all the points are gathered by using GPS, and the address assigned is based on the GPS points.

Date of Application: _____

Name and Address of person requesting address

Latitude/Longitude of House Center: _____

.....

Date/Person receiving application: _____

ADDRESS ASSIGNED TO PROPERTY:

ESN: _____ Inside City Limits of: _____

Assigned by: _____ How Notified: _____ Date: _____

Addresses issued will be null and void if any of the following occur:

Start Work: Must begin within 6 months of address issuance. Failure to begin construction within this time frame will result in your having to reapply for an address.

Work Suspension: If work stops for too long (e.g., a year or longer), the address becomes invalid, and the owner will have to reapply and/or have the address validated.

Transfer of property ownership: addresses become invalid if the property sells/transfers ownership without the construction of the structure. The new property owner must reapply and/or ask for the original address to be validated based on the driveway and structure GPS coordinates being marked by the new owner.

Changing Driveway and/or Structure Location: If, after being issued an address, the driveway location or structure location changes, you must notify the issuing agency to determine if the address needs to be changed. Moving your driveway's physical access point can change your official address because an address is often defined by where a structure connects to the street, requiring coordination with your local 911/Emergency services to update maps and assign a new number, especially if it significantly alters access or street connection, which requires permits and municipal approval for safety and routing.
